

The world needs great solutions.
Build yours faster, with Power Apps.

Business and IT challenges during COVID-19

New digital business models

Time & resource constraints

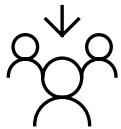

Office closures

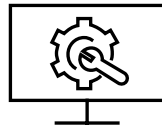

Remote working

Employee self-isolation

Adapting to employee needs

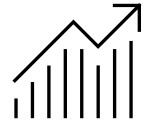

Limited agility

Emergency measures needed

Development delays

Economic recovery

Benefits of low-code app development

Low-code platforms enable a visual approach to building apps, empowering everyone, regardless of whether they can code or not, to quickly turn their bright ideas, into brilliant apps.

For speed

Leverage the Common Data Service with pre-built AI models in AI Builder, and unlock value faster across your organization.

For efficiency

Build custom apps in hours—not months—that connect to your existing data and systems to solve problems faster and drive efficiency

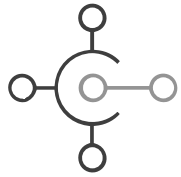

For adapting quickly

Reduce time & cost building web and mobile applications, enabling you to get through your development backlog.

Microsoft Power Apps unlocking innovation

Less code. More Power. Faster Innovation.

For all organizations

Use templates, drag and drop functionality or custom code to build pixel perfect simple to mission critical web and mobile applications.

For all makers

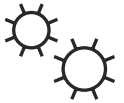

A full featured end to end low code application development platform built for citizen and pro developers, with IT in control.

For immediate impact

Increase agility across your organization by rapidly building low-code apps that modernize processes and solve tough challenges.

Use Power Apps for

Rapid Crisis Response

Leverage pre-built Crisis Response solutions that can quickly and easily be customized and deployed

Empowering Remote Workers (**Discussed in this presentation**)

Enhance collaboration and ensure that processes and solutions can be adapted to meet your remote workers needs and be their most productive selves.

Moving Forward together

Leverage existing investments, and streamline operations for efficiency and cost savings, unlocking additional value with your existing talent.

Empowering Remote Workers

Enabling remote work

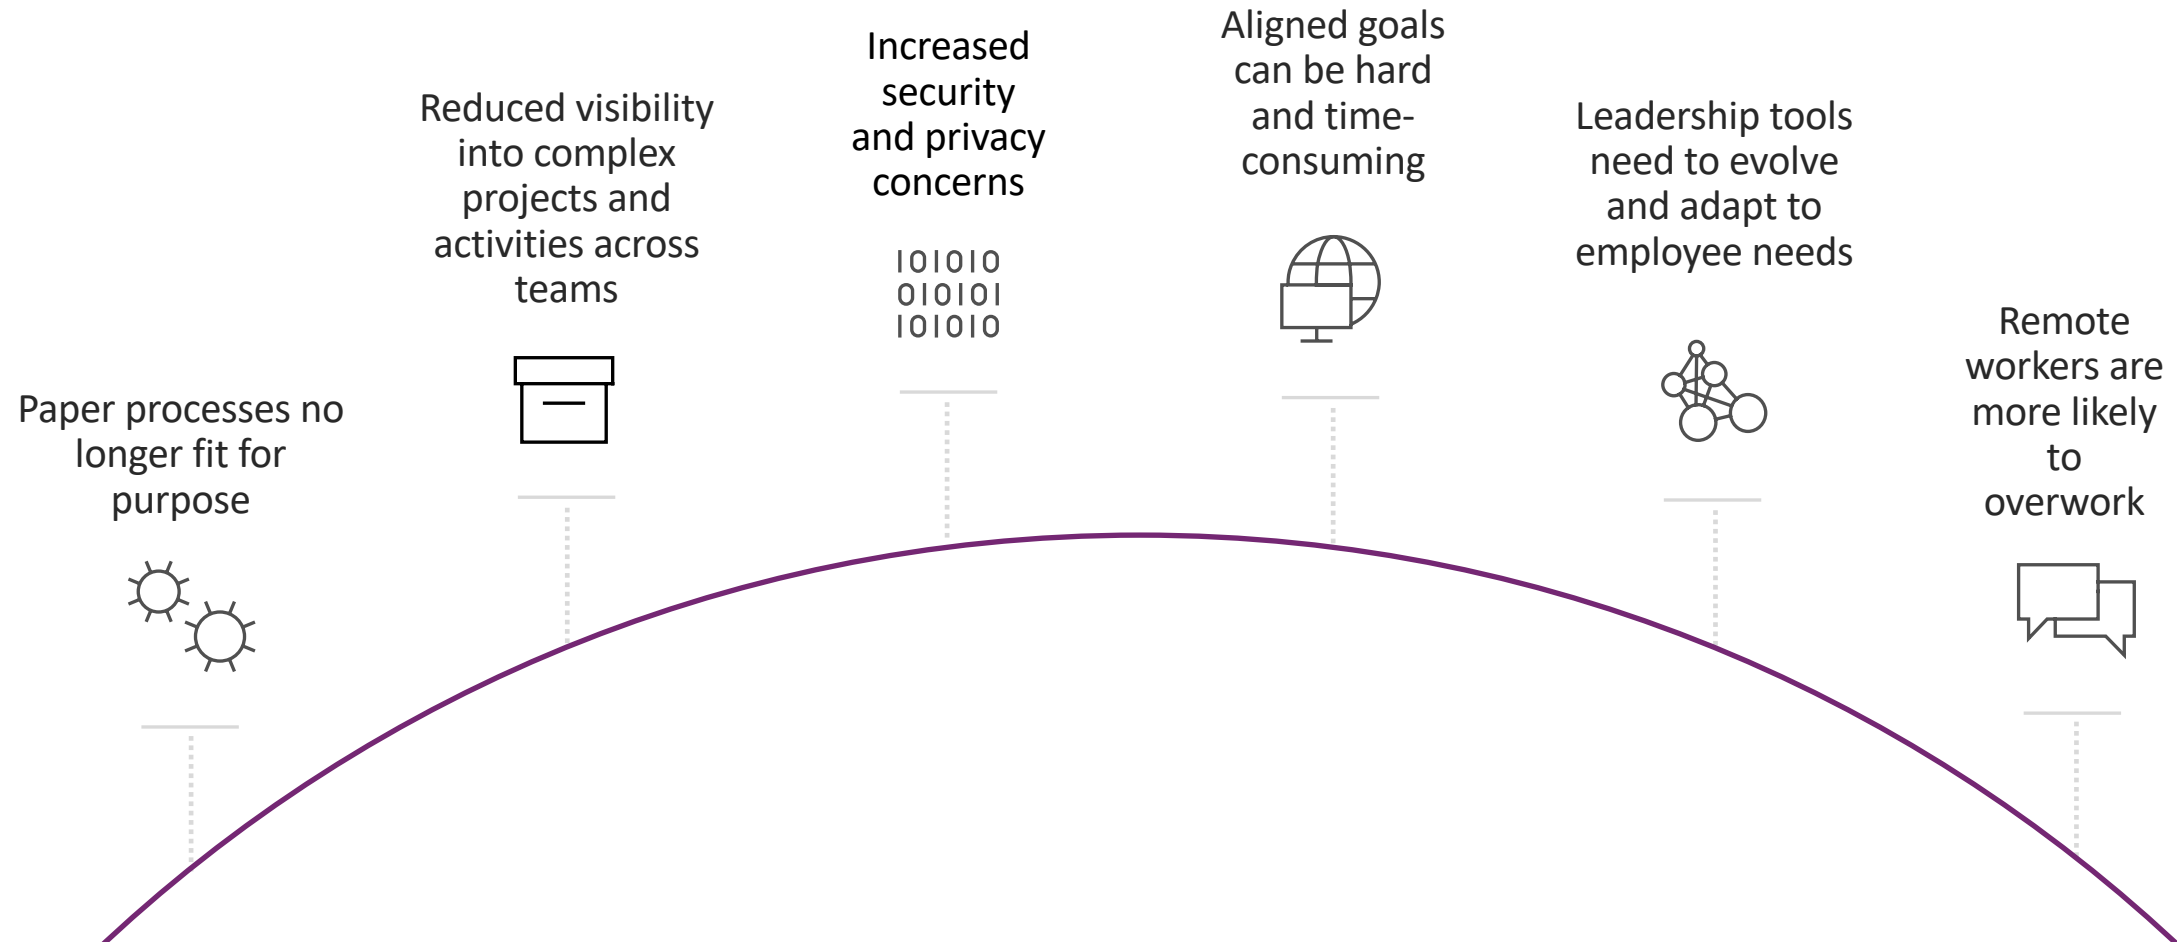

With COVID-19 impacting people around the world, organizations everywhere are pivoting to remote work and putting the safety of their employees, customers, and communities first.

We are committed as a company to making public health our priority and doing what we can to address the economic and societal impact of COVID-19.

We also recognize the vital role that technology plays in supporting people and organizations each day, today and in the long term.

Challenges facing remote workers

Teams around the world are rapidly adapting to new working conditions

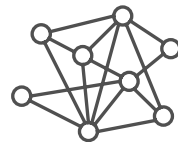

Enable your business to be agile and ensure business continuity

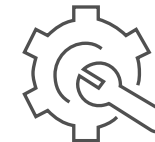

Empower people to stay productive

Quickly and easily develop low-code apps and forms for any device that enhance remote employee productivity, saving time, and enhancing communication and collaboration.

Develop faster, at scale

Whether you need 1 or 1000 apps, fast; with built in connectors, a fully managed data platform, the quickest low code tool to learn can help you be agile when it matters most.

Maintain security and control

GDPR compliance and built in enterprise grade security. No compromises on governance and security. One centralized view of all apps, eliminating shadow IT.

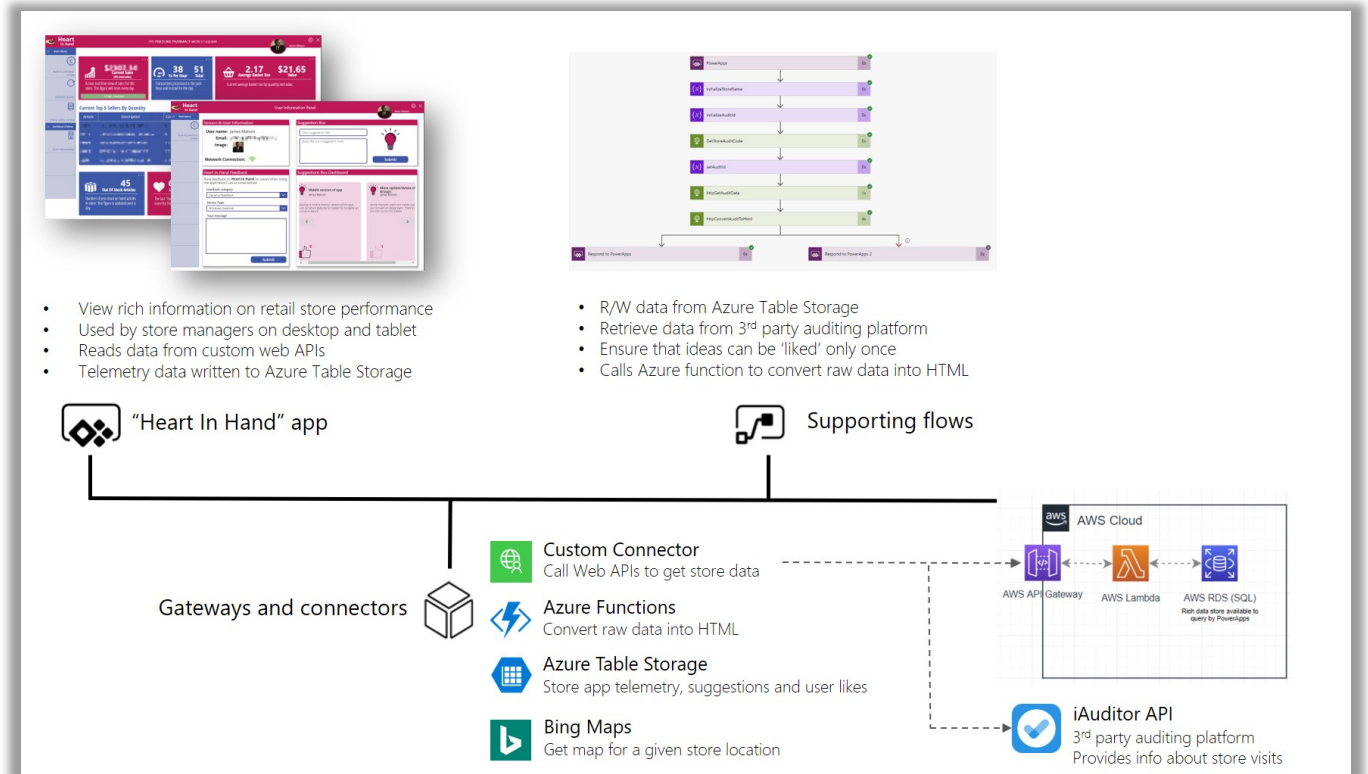

Power Apps for Office 365 is the **only** low-code productivity tool that empowers more than **180 million commercial subscribers** of Office 365 to become citizen developers, **easily build apps** and **automate processes** that **extend Office 365** common productivity scenarios.

Get clarity when you need it most and improve decision making with real time insights, like Priceline Pharmacy

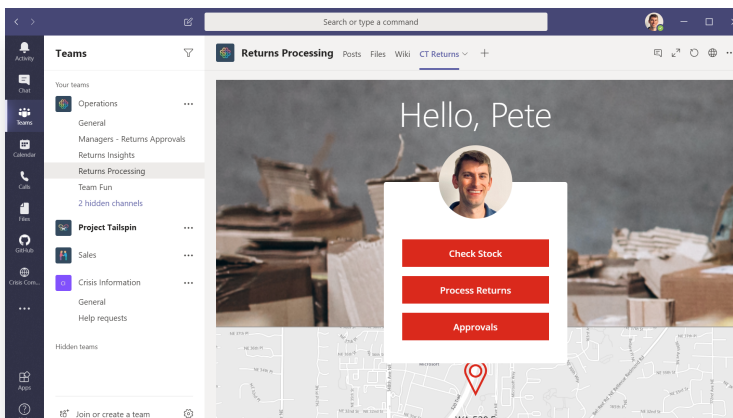

Pharmacy company transforms access to data to provide transparency to business leaders

“From only a week or two of prototyping it became apparent that any preconceived notions I had of low-code were about to be blown away.”

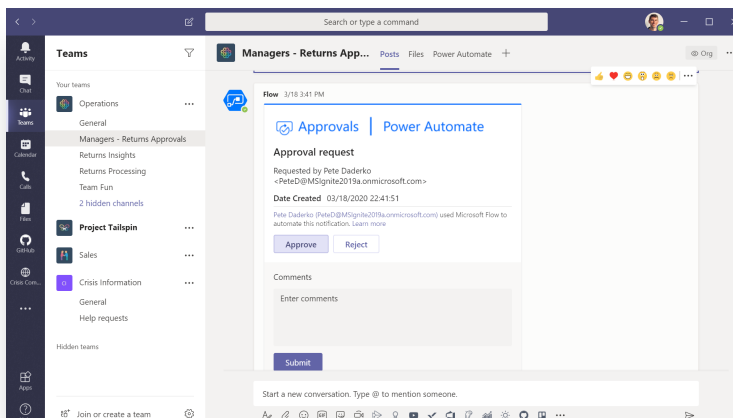

– **James Matson,**
IT Retail Innovation Lead

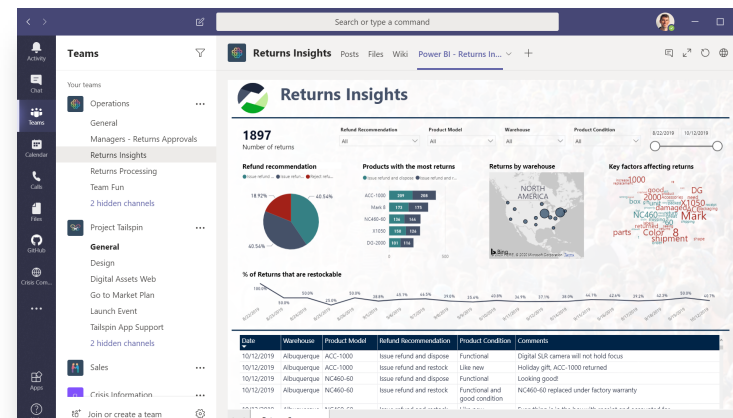

Adapt processes and tools and empower remote workers

No printer, no problem. Easily streamline processes and tools like inventory management with Power Apps and save your remote workers time.

Leverage existing talent and empower everyone to quickly build apps to solve problems using an intuitive and easy to learn low code tool.

Teams may not be in one place, but make sure your data is. Get teams aligned with one consolidated view, with the common data service.

Empowering remote workers with Power Apps, anywhere

American Red Cross

650 remote volunteers leverage app that reduced order lifecycle from 4 weeks to 4 days for critical supplies

Belron

Time-savings of an app that stream-lined processes for remote workers and created +1.66 million savings per year

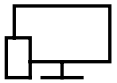

Standard Bank

Built an app in 24 hrs that is used by 300 remote workers every day to inspect ATMs all over South Africa

Power Apps and Microsoft Teams, better together

Teams is increasingly the workplace for millions of remote workers, and Power Apps keeps people productive in context.

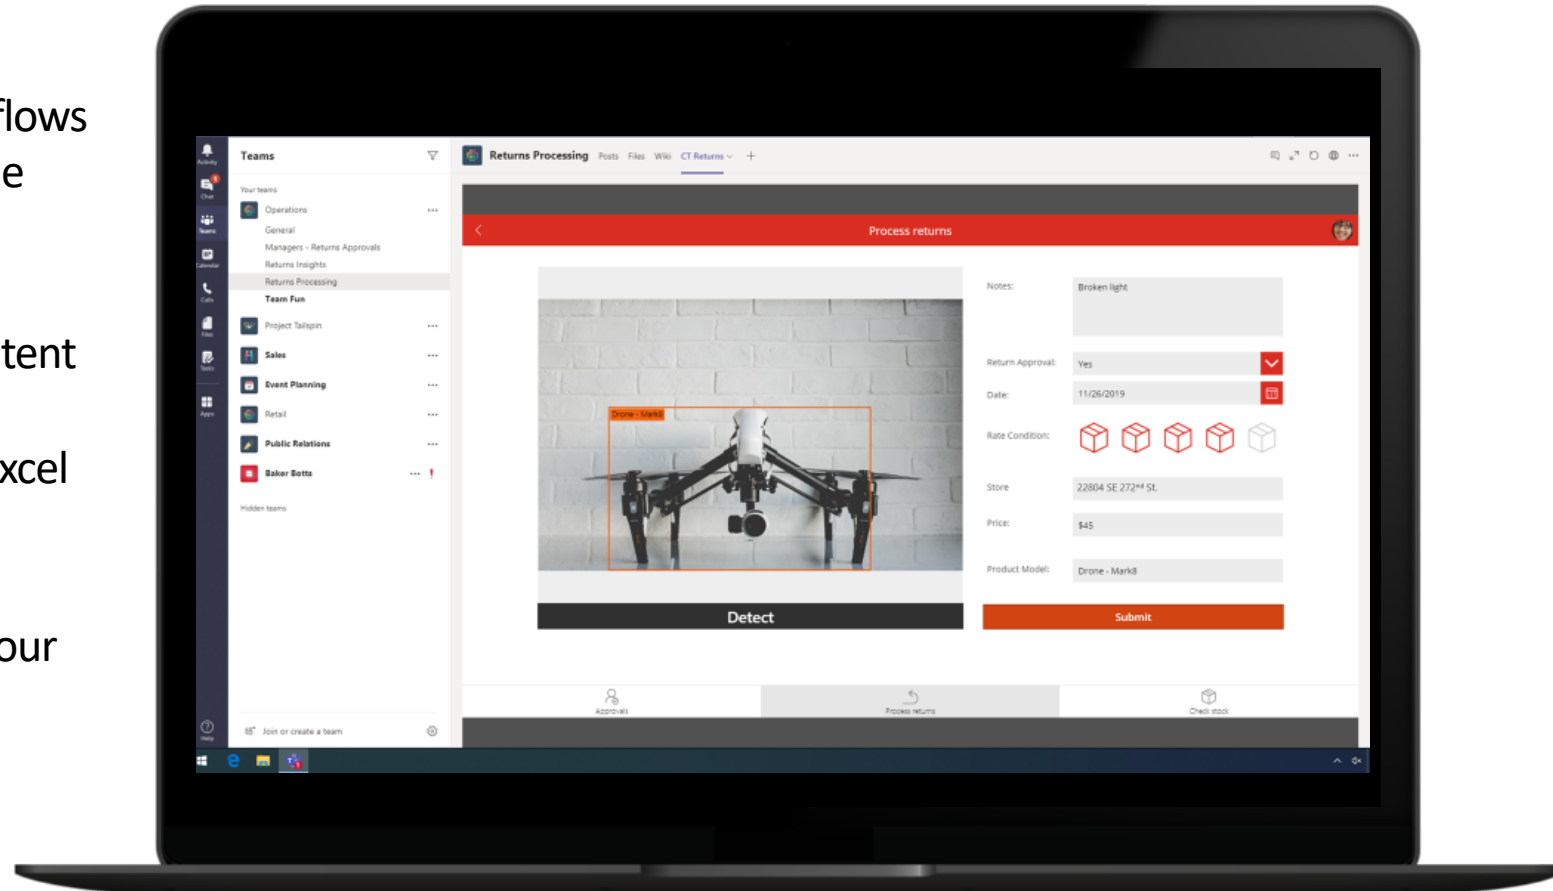

Integrate and share apps and workflows for broad distribution and to provide visibility to all employees

Collect, manage, and distribute content and data to remote workers using SharePoint, Microsoft Forms, and Excel

Streamline business processes with integrated apps and workflows in your hub for teamwork and productivity

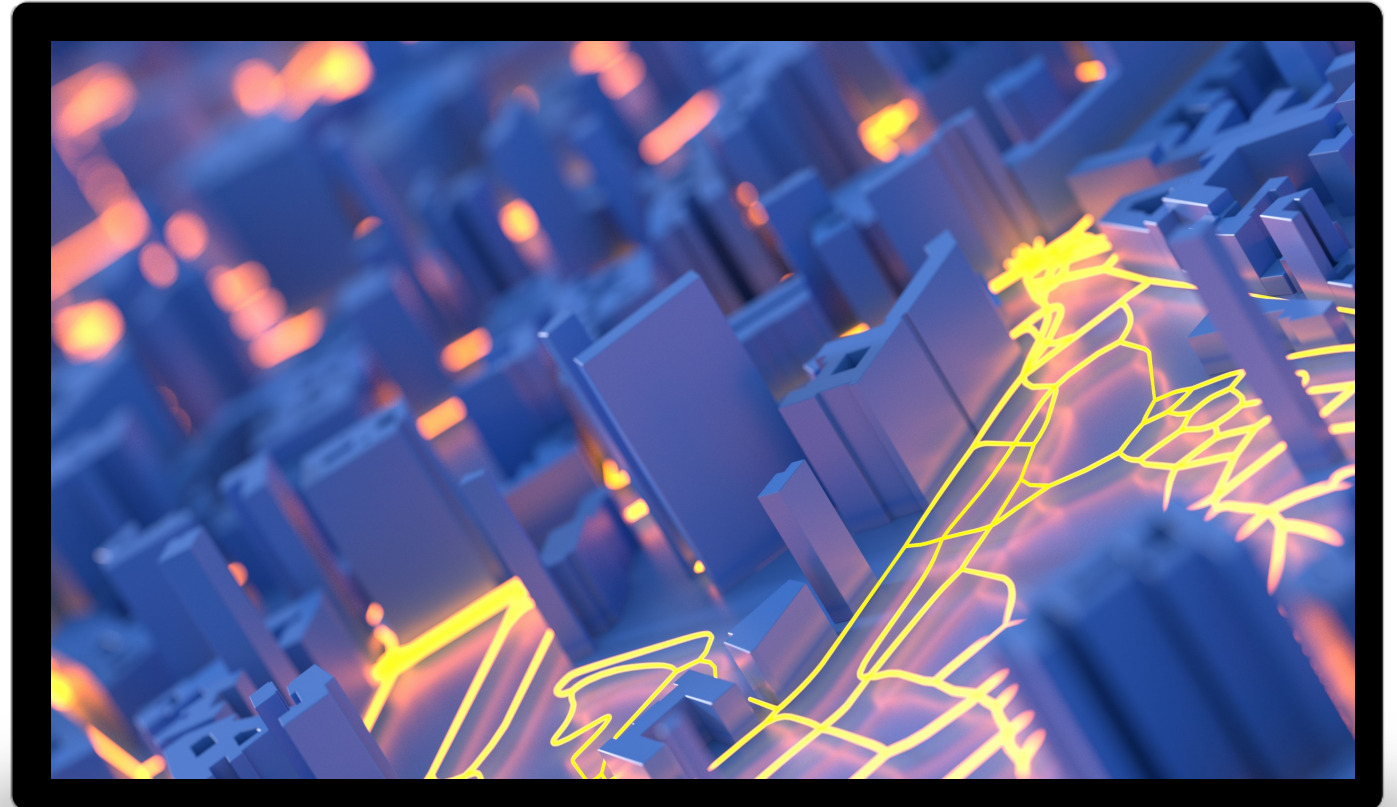

Modernize and streamline processes for remote workers, with Power Apps and Teams, like Telstra

Leading telecommunications and technology company leveraged their existing investment in Office 365 to provide autonomous assistance to remote field service techs

“The lightbulb moment for us came when we realized what we could accomplish by combining our own knowledge and insights with Microsoft Teams and the Microsoft Power Platform. **Our field employees could access everything they needed to serve a customer in one place, accessible from any device**”

Richard French, Principal – Field Digitization

Fast low-code solutions at scale for external users with responsive websites via portals

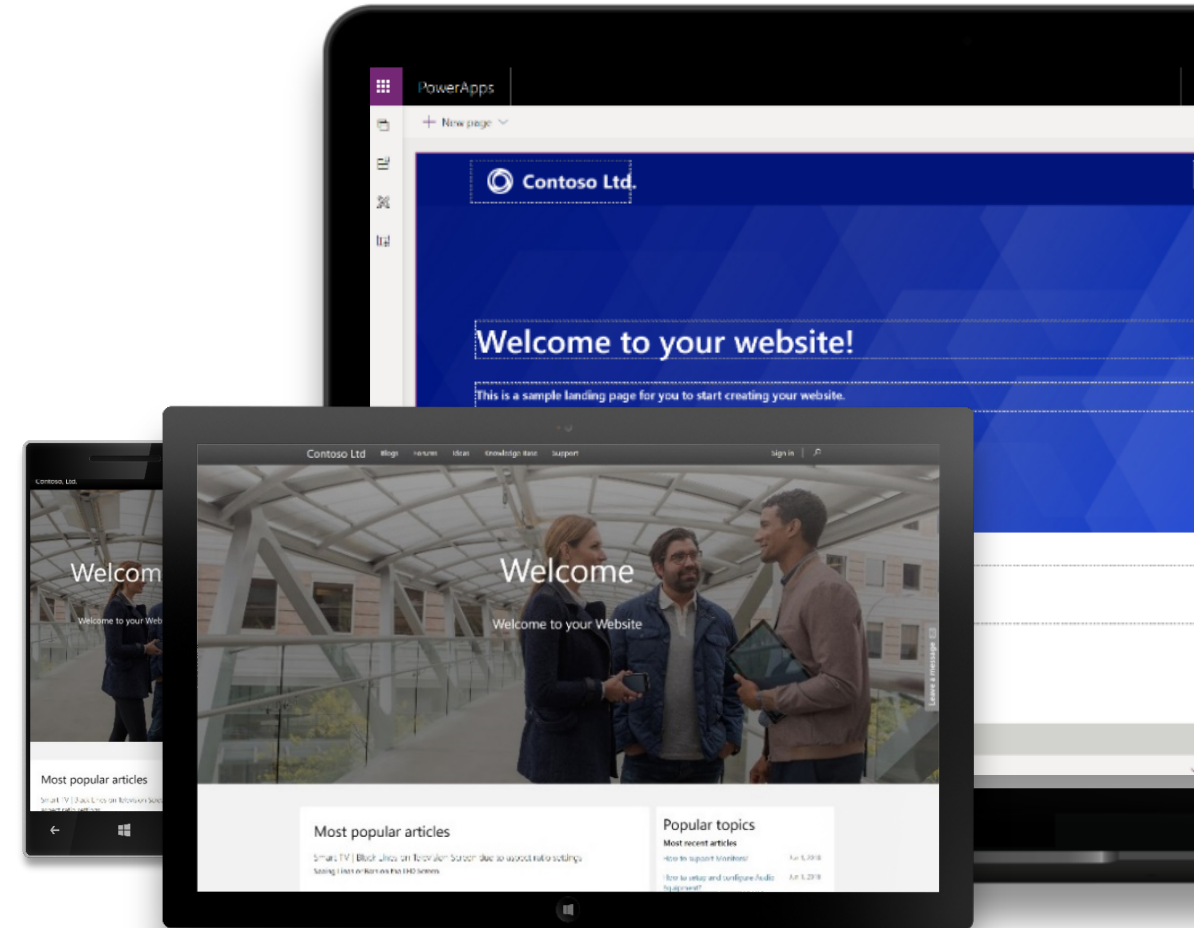

Leverage portals for an immediate short-term solution, including isolation support, healthcare testing and business support recovery, or citizen, student and community self service.

Enable incredible scale by easily creating multilingual, responsive websites to engage with internal and external customers, partners and employees.

Use WYSIWYG designer that empowers non coders to easily build solutions with just business requirements, to create website content and enrich with data that uses familiar constructs like forms, views, charts, dashboards.

Power Apps drives business transformation

Learn how businesses reduced development costs and increased overall efficiency using Power Apps

188%

ROI over three years

74%

Reduction in app development costs

3.2 hrs

Line-of-business employee productivity
improvement per week
